

Stone, E.L., Wakefield, A., Harris, S., and Jones, G. 2014. The impacts of new street light technologies: experimentally testing the effects on bats of changing from low pressure sodium to white metal halide. *Phil. Trans. R. Soc.* doi: 10.1098/rstb.2014.0127.

ESM1. Location of the eight paired control and experimental street light sites (P1-P8) in the three Cornish towns of Launceston (top left), Penzance (top right) and St Austell (bottom left) used in the final analyses. Control sites (LPS lights for both sampling periods) are indicated by orange squares, experimental sites (LPS before changeover, metal halide after changeover) are indicated by white circles. The two lights in each pair are connected by a black line.
